Q1. Retrieve a list of user information with their name and date of registration who uses android phones. First look at the structure of the user_info table in database and then write your query.

Solution:

```
SELECT name, registration_date
FROM user_info
WHERE operating_system = "Android";
```

Q2. Edit your query above to find out users who have registered on or after 14th of july and sort the list of users in ascending order.

Solution:

```
SELECT
    name, registration_date
FROM
    user_info
WHERE
    operating_system = 'Android'
        AND DATE(registration_date) >= '2023-07-14'
ORDER BY registration_date ASC;
```
